DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3-7, drawn to a method of screening or diagnosis of a cardiovascular disorder, with a special technical feature of wherein the decrease in the level of the polypeptide to a control is indicative of a cardiovascular disorder.

Group II, claim(s) 2, drawn to a method of predicating a cardiovascular disorder, with a special technical feature of wherein the increase in the polypeptide level compared to a control is indicative of a risk of developing a cardiovascular disorder.

Group III, claim(s) 8, drawn to an isolated polypeptide, including SEQ ID No. 1-6.

Group IV, claim(s) 9, 10-12, 14, drawn to an antibody selectively bound to SEQ ID No. 1-6.

Group V, claim(s) 13, drawn to a method of preparation of a medicament using the polypeptide, including SEQ ID No. 1-3.

Group VI, claim(s) 15, drawn to a method of identifying a CPP modulator, with a special technical feature of measuring the CPP activity.

Group VII, claim(s) 16, 18, 19-20, drawn to a method of identifying a CPP modulator, with a special technical feature of using a matched control non-human animal.

Group VIII, claim(s) 17, drawn to a method for monitoring efficacy of treatment of a subject having or at risk of developing cardiovascular disorder, with a special technical feature of adjusting the administration of the agent according to the test results.

2. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1641

With respect to Group I-III, V, Bridon et al. teach a SEQ ID No. 939 (See WO200069900; applicant submitted International Search Report, at page 2/5, reference "Y") which is the same as the recited SEQ ID No. 3 in the instant claim. Particularly, Group III, directs to an isolated polypeptide SEQ ID No. 3 which is identical to the SEQ ID No. 939 of Bridon et al. reference).

With respect to Group III, V, Yanagita et al. teach a SEQ ID No. 2 (See US 6852692) which is identical to the recited SEQ ID No. 1 in the instant claim.

Therefore, the invention of Group I-VIII do not fulfill the requirement for unity of invention under Rule 13.1 PCT. Accordingly, the method of preparing or analyzing or are not so linked as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1641

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
